

# SQL Knowledge

19 October 2023 09:20

Primary Key	Unique Key
Not Null	Can have Null
Only one Primary key is possible in Table	Table can have multiple Unique keys
PK creates Clustered index automatically	Unique Key does not

## Documentation of SQL Server and Learning

[Link](#) of Google Docs

A Foreign key is a field that can uniquely identify each row in another table

<https://popsql.com/blog/normalization-in-sql>

- a. Use Common Table Expression for Small Data set.

## Best Practice
